# HEALTH NUGGET

Diabetes happens when the pancreas is unable to make enough insulin or the body cannot effectively use the insulin it produces so increased amount of sugar builds up in the blood.

Insulin- a hormone naturally released by the pancreas - essential in breaking down the sugar (glucose) to be used by the cells for energy.

Diabetes is the 7th leading cause of death in the US.

77% African American are diagnosed more likely with diabetes than others.

A leading cause of heart attack, stroke and other serious health problems like kidney disease, impotence, blindness and amputations.

Prevention and control is the key!

See your healthcare providers and seek advise!!!
